

TRUE SAE Diamond Features → DDR\_bin Pathway Mapping

9 resistance-elevated features all map to DNA Damage Repair pathway

d=0.64  
p=0.015

TP53(28), UBAP2L(1), ENTPD3(1)

d=0.63  
p=0.025

DNA Damage  
Repair

- Summary Statistics:
- 9 diamond features (higher in resistant)
    - All features map to DDR pathway
    - TP53 dominant: 28/30 top variants
      - Mean Cohen's d: 0.58
    - All p < 0.05 (Mann-Whitney U)
