# CT Abdomen and Pelvis with IV Contrast

## Important Information About Your Test Results ▾

## Results

### Study Result

#### Narrative & Impression

##### EXAMINATION:

CT SCAN OF THE ABDOMEN AND PELVIS WITH INTRAVENOUS CONTRAST

##### CLINICAL INFORMATION:

Status post robotic total colectomy and ileorectal anastomosis 01/02/2024.

Small wound opening with bloody discharge. Evaluate for hematoma.

T14.8XXA Other injury of unspecified body region, initial encounter.

##### TECHNIQUE:

Axial images were acquired with intravenous contrast and multiplanar reformats were archived.

Contrast: IOHESOL 300 MG/ML IJ SOLN 100mL. Oral contrast.

##### COMPARISON:

CT abdomen and pelvis 01/08/2024.

##### FINDINGS:

Lower Chest: The lung bases are unremarkable.

Hepatobiliary: There is a stable right hepatic cyst. The gallbladder is unremarkable.

Spleen: The spleen is unremarkable.

Pancreas: The pancreas is unremarkable.

Adrenal Glands: The adrenal glands are unremarkable.

Genitourinary: There is no evidence of urinary tract calculus or hydronephrosis. Bladder is unremarkable. IUD is present in the uterus. New left ovarian cysts measuring up to 5.2 cm inferiorly and 4.4 cm superiorly.

Peritoneum / Retroperitoneum: The peritoneum and retroperitoneum are unremarkable.

Gastrointestinal Tract: The patient is status post total colectomy. There is a primary ileal rectal anastomosis. There is no bowel obstruction.

Lymph Nodes: Lymph nodes are unremarkable.

Vasculation: Aorta and iliac vessels are normal in caliber.

Bones: The bones are unremarkable.

Other Soft Tissues: There is a collection within the midline lower abdominal inferior rectus musculature with a thin linear connection to the skin

surface measuring 6.1 x 1.8 x 3.8 cm (2:67, 602:89). This collection previously measured 6.8 x 1.3 x 4.2 cm. There are additional postsurgical changes in the anterior abdominal wall with no associated fluid collections.

**IMPRESSION:**

1. Lower abdominal wall/rectus collection with tract to the skin surface.
2. No bowel obstruction or intra-abdominal collection.

Electronically Signed By: Dwight Aberle on February 01, 2024 01:41 PM

I, Dwight Aberle, have personally reviewed this report and concur with its findings and conclusions, as affirmed by my electronic signature.
